

CLAIMS

1. A holder for a beverage container, comprising a container receptacle; a gripping device having holding jaws which are capable of being pressed resiliently away and project into said container receptacle; and sideways by means of which said holding jaws are mounted.

2. A holder as defined in claim 1, wherein said sideways for mounting said holding jaws are curved.

3. A holder as defined in claim 1, wherein said sideways include two non-parallel sideways for mounting each of said holding jaws.

4. A holder as defined in claim 1, wherein said container receptacle is formed as a removable tray.
